

Scenario ID	Scenario Name	Scenario Description	Preconditions	Expected Outcome
TS_01	Verify User Registration	Validate that a new user can create an account using valid registration details.	User is not already registered on the application.	User account is successfully created.
TS_02	Verify User Login	Validate that the registered user can log in using valid credentials.	User must be registered.	User logs in successfully and dashboard is displayed.
TS_03	Verify Home Page	Validate that the application home page loads correctly with all key navigation and search components.	User is on the application homepage or search page.	Home page renders fully with all UI elements and search widgets responsive.
TS_04	Verify Property Search	Validate that a user can search for properties using keywords, locations, or filters.	User is on the application homepage or search page.	Relevant property listings matching the search criteria are displayed.
TS_05	Verify Area Calculator	Validate that a user can use the area calculator tool to convert or compute property measurements.	User is logged in and viewing the area calculator tool.	The tool accurately computes and displays the correct measurement results.
TS_06	Verify Property Filters	Validate that the user can filter property search results based on price, BHK, and amenities.	User has performed a property search and is viewing results.	Property listings dynamically update to display only those items matching the selected filters.
TS_07	Verify Property Search Results	Validate that property search results display correct sorting options, pagination, and accurate cards.	User has successfully initiated a property search.	Results are correctly displayed with sorting and pagination working smoothly.
TS_08	Verify Property Details	Validate that a user can view complete details, photos, pricing, and amenities of a selected property.	User has clicked on a specific property listing from the search results.	Property details page displays comprehensive information, photo gallery, and pricing.
TS_09	Verify Profile Management	Validate that the user can view and update their personal account profile and preferences.	User is logged into the system.	User profile information is successfully updated and saved changes are reflected.
TS_10	Verify Post Property	Validate that a property owner or agent can successfully submit a new property listing with necessary details.	User is logged into the system with owner/agent permissions.	Property listing is successfully created, verified, and published to the platform.
TS_11	Verify Property Details	Validate that a user can safely log out from the application session.	User is logged into the system.	User is logged out and redirected to login page.
